

HEIFER RAISING

Six Tips for Choosing Which Heifers to Raise

When calvings are more abundant, like in August and September, it is advisable to choose which heifers should be kept.

Heifer selection is especially justifiable this year, since forage inventories are at an all time low in certain regions.

WHAT'S NEW ON OUR WEBSITE?

Some of our tools are now available in Spanish for foreign workers.

More and more dairy producers rely on foreign workers to help them temporarily on their farms.

In addition to our [FIATÉ](#) service, which facilitates their integration to help them become quickly operational, our website now offers a brand new section containing a set of [practical information sheets](#) in Spanish. Simply click on the sheet you are interested in and then on the link provided to access the

Inbreeding Trends in Canadian Dairy Breeds

GENETICS

Inbreeding Update - August 2020

Each year, based on official animal registration and pedigree information within its database, Lactanet Canada computes current statistics related to the level of inbreeding within the Canadian cow population of each dairy breed.

Here are the most recent statistics based on females born in Canada since 1970 up to and including registered heifers born in 2019.

Dairy cows on pasture: myths versus facts?

Apart from herds under organic management, there aren't many cows on pasture on Quebec farms.

Yet it's common practice in other parts of the world. Why not here?
