valacta

## Various jobs are available

### Dairy Production Advisor

With the wide array of tools available at Valacta (softwares, reports, etc.), analyse herd performance and provide the producer with useful advice to improve herd productivity and profitability, and help solve problems. Promote Valacta services.

### Dairy Production Technician

Supervise milkings and collect milk recording data for supervised tests. Collect a variety of other data at the farm and upload it to the computer system. Determine the strengths and weaknesses of the herd with the producer. Point the producer towards the best solution to solve problems and improve herd performance. Contribute to client development.
