GestaLab: A reliable no-contact option to detect pregnancies

The current situation is shaking up the way things are done on the farm and forcing you to find solutions to manage the herd. GestaLab is a reliable no-contact option to detect pregnancies as early as 26 days post breeding. Available to all producers at any time, here is the information you need to know before to take and ship your samples.

COLLECTIVE DECREASE IN PRODUCTION
How to Meet the Challenge on the Farm

Market needs are being altered by the current situation and producers are being asked to adjust deliveries downwards. We have put together some possible solutions for you to evaluate according to your own situation. Do not hesitate to call on a Lactanet advisor to help you meet this challenge under the best possible conditions.

COLLECTIVE DECREASE IN PRODUCTION
How can you flatten the curve of its effects on your business?

The current situation is likely to have adverse effects on your business. Although we have no control over the imposed production limits, there are still some things that can be done to "flatten the curve" of the financial impact and be resilient during this difficult time. Here are a few options for you to consider...

HEIFER RAISING

Housing for Newly Weaned Heifers: What type of building to choose?

Building a new heifer barn may seem like a fairly simple project at first glance. However, some pitfalls can complicate things during construction, or worse, when the heifers have been moved into their new space. Here are some elements to consider when choosing the option that best suits your needs.
